

Butch was 2 yrs old last May, is good with cats and other dogs and needs to be neutered. He came from a home with kids but not toddlers and needs a lot of affection. He is very active and can jump a 4ft fence. Yes, he is registered but his downfall is his soft ears. I've done his shots and he is on Ivomec for heartworm protection. It would be great if someone could be home with him a good deal of the time at least at first. I don't know if he is house broken. His favorite thing is to be next to you and be petted!!!! I've been working with him about manners and walking properly on lead but he gets distracted easily. He does well with praise and treats.
